

1) Los op m.b.v. de balansmethode

a $7 \cdot g + 6 = 5 \cdot g + 15$

b $8 \cdot g - 15 = 5 \cdot g + 21$

c $8 \cdot g - 15 = 5 \cdot g$

d $12 - 4 \cdot g = 6 \cdot g + 2$

2) Los op m.b.v. de balansmethode

a $12g + 3 = 7g + 18$

b $10 + 6g = 2 + 8g$

c $12 - 4g = 36 + 2g$

d $5g = g + 8$

e $5200 + 15g = 600$

f $-6g + 55 = 4g - 25$

g $3 - g = 6 + 2g$

h $-g + 7 = 4g - 11$

i $320 + 0,5g = 950 - 1,25g$

k $17 = 4 - 11g$
