

Acer campestre

Spaanse aak of
veldesdoorn

Quercus robur

Zomereik

A photograph of several cuttings of Salix alba (white willow) lying on a grey concrete sidewalk. The branches are thin and woody, with several long, lanceolate, green leaves attached. The leaves have serrated margins and prominent venation. The sidewalk is composed of large rectangular tiles separated by expansion joints filled with gravel. The lighting is bright, suggesting a sunny day.

A photograph of a branch of Betula pendula (Weeping Birch) with several green, serrated leaves and two brown, cylindrical catkins. The branch is set against a light blue, textured background. The leaves are ovate with serrated margins and prominent venation. The catkins are elongated and have a textured, brown surface. The branch is thin and woody.
