Ilex aquifolium

Hulst

Acer pseudoplatanus

Gewone esdoorn

Sambucus nigra var.
lacinata

Peterselievlier

Sorbus aucuparia

Lijsterbes

A photograph of a branch of Euonymus europaeus (Kardinaalsmuts) lying on a concrete sidewalk. The branch features several clusters of bright red, round berries. The leaves are ovate and show a mix of green and autumnal colors, including shades of yellow, orange, and reddish-brown. Some leaves have small holes, suggesting insect damage. The concrete sidewalk is composed of large, light-colored slabs with visible expansion joints.
