

# DIM Python voor BE

Exercise 03

20.11.2025

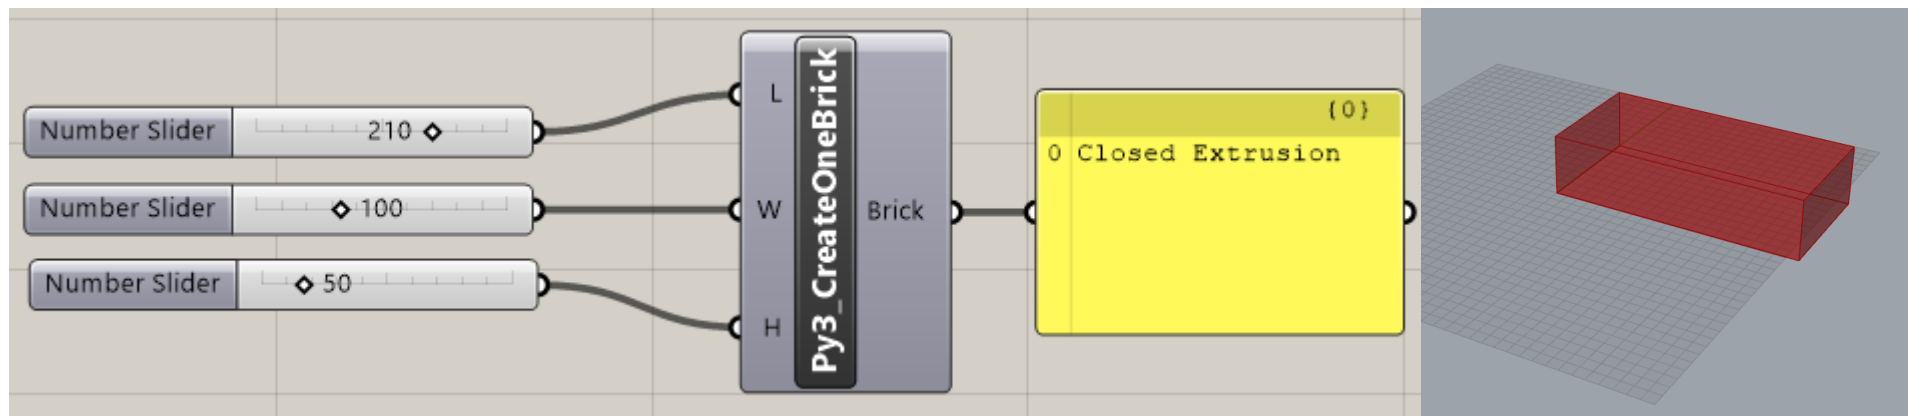

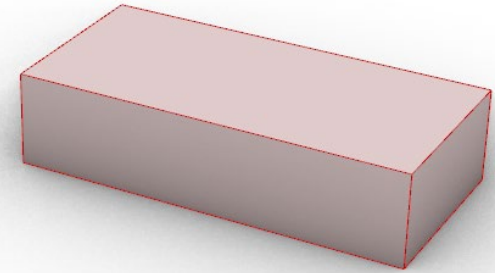

## 6.4 Exercise

Exercise:

Create a parametric 3D Brick Stone which can be adjusted by number sliders. Once finished create two more variations:

- 1) A Beam with the dimensions (HxWxL): 400x200x6000mm
- 2) A City Block with the dimensions: 200x100x15m

steps we did in the lecture and try to avoid to just copy the code from elsewhere...
