You may have noticed that this ReadBox Project required you to work within a project-based learning environment. To engage this in class you had to take charge of your ReadBox project, make a lot of choices and self-direct your very own personal learning process. Your teacher was your coach during this project. Now you have reached the end of this project and I would like you to reflect on your own learning process. Having finished the last processing task in the project, please fill out this self-reflection form in English (or in Dutch if you do not know how to express yourself in English). Self-reflection is important in order to develop a deeper level of understanding about yourself. Think about what you did during the course of this project, and how well the project went.

1) Looking back on your expectations and hopes that you had at the beginning of this project, have they come true ?
