

$$8a \text{ I} \rightarrow B = 22,5 + 0,1t$$

$$\text{II} \rightarrow B = 10 + 0,15t$$

$$b \quad t = 250 \text{ want } \left. \begin{array}{l} 22,5 + 0,1 \times \underline{250} = 47,50 \\ 10 + 0,15 \times \underline{250} = 47,50 \end{array} \right\} \text{ even veel}$$

c Bij 250 minuten bellen is het even duur.

$$d \quad 22,5 + 0,1t = 10 + 0,15t$$

ge 250 minuten

$$f \quad \left. \begin{array}{l} 22,5 + 0,1 \times 250 = 47,50 \\ 10 + 0,15 \times 250 = 47,50 \end{array} \right\} \text{ even veel.}$$

$$9a \quad (1,5 ; 7)$$

b Bij 1,5 g is het beide 7 u

$$c \quad 1,5$$

$$d \quad \left. \begin{array}{l} 4 + 2 \times \underline{1,5} = 7 \\ 10 - 2 \times \underline{1,5} = 7 \end{array} \right\} \text{ even veel}$$

$$10 \quad A = 2 \quad (x = 4)$$

$$B = 3 \quad (x = 1)$$

$$C = 1 \quad (x = -2)$$
