

► Je begrijpt de strategie: 1 x meer en 1 x minder bij de tafels.

doel 4

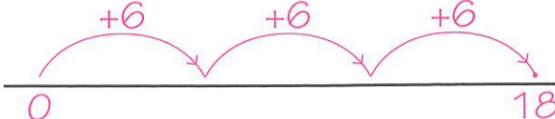

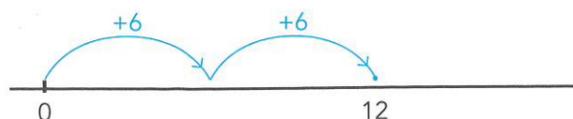

start Reken uit.

$4 + 2 = \underline{6}$	$10 + 2 = \underline{12}$	$6 + 3 = \underline{9}$	$15 + 3 = \underline{18}$
$8 + 4 = \underline{12}$	$20 + 4 = \underline{24}$	$10 + 5 = \underline{15}$	$25 + 5 = \underline{30}$
$12 + 6 = \underline{18}$	$30 + 6 = \underline{36}$	$14 + 7 = \underline{21}$	$35 + 7 = \underline{42}$

hulp

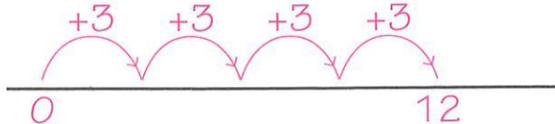

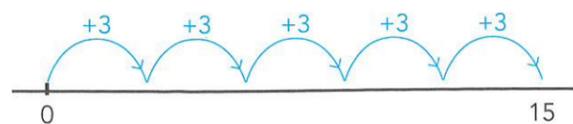

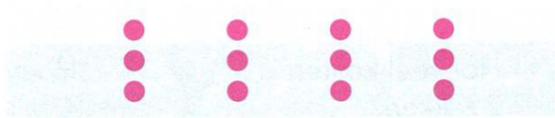

1 1 x meer.

lange plussom: $6 + 6 = 12$
keersom: $2 \times 6 = 12$

lange plussom: $6 + 6 + 6 = 18$
keersom: $3 \times 6 = 18$

2 1 x minder.

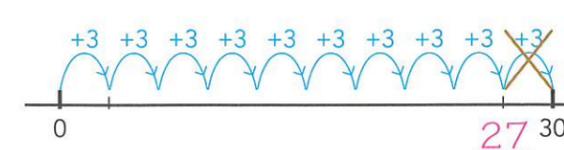

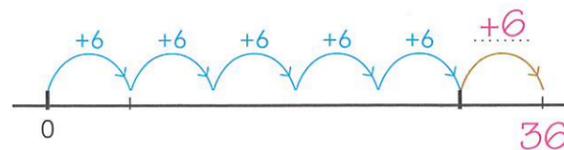

lange plussom: $3 + 3 + 3 + 3 + 3 = 15$
keersom: $5 \times 3 = 15$

lange plussom: $3 + 3 + 3 + 3 = 12$
keersom: $4 \times 3 = 12$

hoe ging het?

3 1 x meer, 1 x minder.

$5 \times 6 = 30 \rightarrow 6 \times 6 = 36$ (30 + 6)

$10 \times 3 = 30 \rightarrow 9 \times 3 = 27$ (30 - 3)

4 1 x meer, hoeveel meer?

$2 \times 5 = 10 \rightarrow 3 \times 5 = 15$ (10 + 5)

$10 \times 3 = 30 \rightarrow 9 \times 3 = 27$ (30 - 3)

$2 \times 4 = 8 \rightarrow 3 \times 4 = 12$ (8 + 4)

$10 \times 5 = 50 \rightarrow 9 \times 5 = 45$ (50 - 5)

$2 \times 7 = 14 \rightarrow 3 \times 7 = 21$ (14 + 7)

$10 \times 6 = 60 \rightarrow 9 \times 6 = 54$ (60 - 6)

$2 \times 9 = 18 \rightarrow 3 \times 9 = 27$ (18 + 9)

$10 \times 8 = 80 \rightarrow 9 \times 8 = 72$ (80 - 8)

5 1 x minder, 1 x meer.

$4 \times 2 = 8$ (10 - 2) ← 1x minder - $5 \times 2 = 10$ - 1x meer → $6 \times 2 = 12$ (10 + 2)

$4 \times 7 = 28$ (35 - 7) ← 1x minder - $5 \times 7 = 35$ - 1x meer → $6 \times 7 = 42$ (35 + 7)

$4 \times 4 = 16$ (20 - 4) ← 1x minder - $5 \times 4 = 20$ - 1x meer → $6 \times 4 = 24$ (20 + 4)

$4 \times 9 = 36$ (45 - 9) ← 1x minder - $5 \times 9 = 45$ - 1x meer → $6 \times 9 = 54$ (45 + 9)

6 Maak sommen. bijvoorbeeld:

$2 \times 5 = 10 \rightarrow 3 \times 5 = 15$

$10 \times 2 = 20 \rightarrow 9 \times 2 = 18$

$2 \times 2 = 4 \rightarrow 3 \times 2 = 6$

$10 \times 3 = 30 \rightarrow 9 \times 3 = 27$

$2 \times 3 = 6 \rightarrow 3 \times 3 = 9$

$10 \times 10 = 100 \rightarrow 9 \times 10 = 90$

kijk terug

$4 \times 3 = 12$ ← 1x minder - $5 \times 3 = 15$ - 1x meer → $6 \times 3 = 18$
